

AMPHORA COLLECTION

BY BOVER

The AMPHORA collection has been designed to create a warm environment especially in outdoors. However, thanks to its highly decorative look, the Amphoras can equally be placed both in outdoor and indoor. The size and shape of this collection pay a subtle and discreet homage to the terracotta amphora formerly used to store food. In this collection we have used a synthetic wicker to make up big handmade baskets as shades with a tripod foot subjected to a cataphoresis treatment. The light source is located inside the polyethylene ellipse which grants its water proofing. The light emitted by the Amphora collection is full of nuances and shapes .
