

BEETLE DINING CHAIR- OUTDOOR

BY GUBI

With its striking, organic form, remarkable comfort and endless configurations, GamFratesi's iconic Beetle Chair is now ready for the great outdoors.
The Beetle Chair's durable shell is a continuous, curved form, reminiscent of the strong and graceful contours of the insect that inspired it. The UV-protected shell and legs mean it can be used both outside and inside. Despite its robustness, it is designed to gently flex, providing comfort even after prolonged sitting, while their lightness makes them exceptionally portable. Matt-satin textured beige or alabaster white shells are available with matching legs, while an optional seat cushion with a fabric designed for outdoor use can be added for extra comfort.
