

BM 5768 DECK CHAIR FOOTSTOOL

BY CARL HANSEN & SON

The BM5768 Footstool was designed in the late 1960s by Danish furniture designer Børge Mogensen as part of the Deck Chair Series of beautifully crafted outdoor furniture in solid, untreated, FSC™-certified teak. Perfectly proportioned to match the height of the series' deck chair, the suspended seat of the foldable BM5768 Footstool is upholstered in weatherproof Sunbrella fabric, chosen for its natural look and easy cleaning. Can ideally be parred with BM1069 tray in solid Teak to create an inviting outdoor table.
