

BM4570 CHAIR

BY CARL HANSEN & SON

Børge Mogensen conceived the BM45701 Dining Chair in the late 1960s, as a part of his Deck Chair Series of functional outdoor furniture. The chair's simple, slatted lines and solid teak construction provide durable functionality in a range of outdoor spaces. Fitted with a suspended seat in weather resistant Sunbrella fabric, it folds neatly away when not in use – and can be hung on the corresponding wall mount.
