

FORA COLLECTION

BY BOVER

FORA is technically ready to be installed outdoors, but its warmth allows it to be placed indoors as well. A generous globe, suspended within a woven outer shade with the traditional wicker technique is efficiently illuminating the area with a general and pleasant light. The floor version has a solution that we like because it respects the soil's plant life by allowing as much light, water and air as possible. The FORA synthetic fiber shade is highly resistant to weather, while at the same time providing a pleasant atmosphere of diffused and enveloping light.
