

CH29 SAWBUCK CHAIR

BY CARL HANSEN & SON

The CH29 chair, also known as “The Sawbuck Chair" due to the shape of the chairs legs resembling that of the simple sawbucks or saw horses traditionally used by carpenters and woodcutters, was originally designed for Carl Hansen & Søn by Wegner in 1952. The CH29 chair became an immediate success due to its simple construction, which provides great comfort while still being visually unique.The CH29 is closely associated with Wegner’s CH28 lounge chair and is also available in a similar mix-version with seat and back in walnut and legs in oak.
