

CH88 & CH88T DINING CHAIRS

BY CARL HANSEN & SON

The CH88 and CH88T are versatile both in terms of its appearance and usability thanks to its numerous finish, frame, and room placement options. Characteristically, the upper structure features a steam-bent wooden backrest for back support, with slight curvatures of the backrest's ends providing a natural resting place for the arms. The steel frame, with straight back legs, supports an oval-shaped wooden seat. The seat is available upholstered or a timber finish. This blend of materials, combined with a minimalist design, results in a light, organic, industrial expression.

Dimensions

22.5"W X 17.5"D X 30"H, Seat Height: 17.5"

Material Options

Available in variety of finishes in beech, oak and smoked oak. The frame is available in stainless steel and powder coating in various colors, and the seat with optional leather or textile upholstery.
