

CORNET COLLECTION

BY BOVER

CORNET is a highly technical project, yet full of life. Its form is harmonious, organic and it blends in with nature where there are no straight lines. In the words of Alex Fernández Camps: “Cornet surprised me during the process, and still amazes me every time I see it. The projects are generous with those who are a part of them, always creating experiences to remember. Especially Cornet."
Cornet has a personality strongly rooted in nature and it brightens the space it is in.
It is a lamp made of polyurethane, which is a hard and resistant material that is perfect for public spaces. The Cornet’s use is very versatile. It is mainly used as a bollard lamp but can quickly connect with a wider reality: interior wall lamps, or the post version for intermediate spaces. In all of its designs, Cornet includes a dimmable LED source that distributes light through the lamp’s undulating layers, creating an atmosphere that is natural, slightly broken, but never dominant.
Cornet is a highly technical project, yet full of life.
