

DEW VESSEL

BY SKLO

SkLO Dew Vessels are substantial, visually complex pieces that evoke the molten nature of handblown glass. They start as simply shaped vessels of transparent colored glass which are then layered with dripping pieces of molten clear glass. The outside is then given a frosted finish. The tops are then cut and polished to reveal the unique details of the layers. Bottoms are cut and polished. No two exactly alike. Two shapes, three glass colors. All glass dimensions are approximate – handblown glass dimensions vary by nature and intent. Made in the Czech Republic.
