

LEXINGTON ROUND NEST

BY TOM FAULKNER

The Lexington nest is a combination of three Lexington side tables that fit gracefully together and also look great as tables on their own. This combination can be tailor made to your own measurements and finished in any of our specialist or standard finishes, which can then be combined with clear glass or antiqued mirror glass.
Similar to our Madison and Siena design but with a thinner bar, Lexington is simple and elegant, the Lexington nest is part of our hugely popular Avenues collection.
