

PILOTI STONE

BY FREDERICIA

With its simple, unadorned silhouette and slender profile, Piloti in Stone exudes a unique kind of elegance. The extra appeal is all about the subtle detailing of the table top´s edge ensuring a seamless transition to the legs which merge into a balanced entity. The impression is a single line floating on four delicate legs. The Piloti in Stone tables all have the same height, which makes them ideal to place individually or together in a space to create a sense of continuity.
