

PLATNER ARM CHAIR

BY KNOLL

In the 1960s, Warren Platner transformed steel wire into a sculptural furniture collection, thus creating a design icon of the modern era. The furniture's unique, harmonious forms are produced by welding curved vertical steel wire rods to circular frames, producing a moiré effect and capturing the decorative, gentle and graceful quality that Platner sought to achieve. Metal components are available in two finishes: polished nickel or metallic bronze with a clear protective coating. The seating collection includes a side chair and a lounge chair with complementary stool.

Dimensions

26.5" W x 22" D x 29"H

Material Options
