

PRIVATE SIDEBOARD

BY GUBI

Understated sophistication, timeless aesthetics, and outstanding craftsmanship are the hallmarks of the highly practical Private Sideboard by Space Copenhagen. Inspired by antique Japanese furniture in both style and craft, this oak-veneered sideboard is elevated by two vertical legs, held together by a single horizontal beam, giving strength in structure and yet lightness in appearance. Available in brown/black or light-stained finishes, the body comprises four symmetrical soft-close drawers, each with antique brass finish metal handles. The long, slim top is an excellent surface for ornaments or artworks. Designed to fit snugly against the walls of a living room, dining room or bedroom, or even paired up and placed back-to-back, the Private Sideboard fits perfectly with the other elements from the collection. Classic design, excellent workmanship and immense versatility and functionality ensure that the Private Sideboard will be cherished more and more over time.
