

PUDDLE TABLE - TRAVERTINE

BY ANNA KARLIN

Made from carved Travertine, these tables nest perfectly and can be moved individually to suit the space.
Given the nature of the material, there are various shades and coloring that exist within any given block of travertine. Each set of tables are guaranteed to match, but the exact stone variation will fall within the pictured color options.

Notes
Travertine is a natural material and therefore variations in tone and striation are to be expected
