RAY SCONCE

BY STICKBULB

Ray Sconces are comprised of a metal hardware component that mounts to the wall and holds a wooden bulb vertically or horizontally. The design is so minimal that it draws your attention closer to the subtle details of the wood grain and the machined precision of the sconce construction.The light can face the wall, creating a halo effect around the sconce, or graze the wall, creating a gentle wash of light in an up, down, left, or right direction

Dimensions

Ray Sconce is offered in 18 in, 2ft, 3ft, 4ft, 5ft, or custom lengths.
