

SAGA

BY IN COMMON WITH

Originally created for our own office and production space, the task-oriented Saga Series is an ode to inventive design. Each light incorporates low-waste aluminum and recycled LDPE diffusers, and its mix of warmth and consummate functionality make it well-matched to both homes and workspaces. It's also infinitely customizable: Made up of three modular shapes, it can be configured to support any need. Go long or short, straight or squiggled, offbeat or all-business. No matter the setting, Saga delivers impact, efficiency, and a satisfying sense of order, without a hint of sameness.
