

SKYE CONSOLE II

BY TOM FAULKNER

This is a contemporary metal console table that embodies both a sense of the elemental and the crafted. The piece also evolved from an exploration of steel as a material, with its superb strength existing in tandem with its malleability. The table can be fitted with stone or patinated metal, or wood, or even painted glass which is inset in to the top to add a touch of tactility and contrast, producing an artful piece of functional sculpture.
