

SO WE MEET AGAIN

BY CLASTE COLLECTION

A lovers bench where one's sense of privacy and enclosure is only limited by what is socially acceptable. Available in two heights and choice of clear or bronzed glass this piece become a visual focal point in any space while creating a welcome retreat albeit more so mentally than physically. The high back combined with the depth of the floating marble slab are designed to allow for a surprisingly comfortable seated position while the fragile and delicate nature of the design pushes the experience beyond the expected.
