

SOFTSPOT

BY GIOPATO & COOMBES

The minimal exterior hides an internal architecture manufactured with clockwork precision for extreme LED cooling.
The SoftSpot LED warm white bulb emits 75% light downwards for focused direct lighting and 25% upwards for low indirect lighting. The result is a soft interior atmosphere from a pure form.
The SoftSpot lamp is 100% designed and custom-made from the ceiling plate to the LED bulb. The single internal wheel component fuses together heat-sink, socket and cable block functions whilst allowing light to pass through.

Dimensions

3" x H21.5" + drop

Material Options

Brushed Bronze, Brushed Nickel, Blackened Brass, Brushed Brass, Polished Nickel
White or black cable

Lamping

Power Input
110-120V 50-60Hz

Light Source
Proprietary Softspot
75 LED, 9W, 380 Lumens, 2700K warm white. CRI>95. 75% downwards and 25% upwards

Dimming Standard
Phase Cut 1-10 Volt
