

WOVEN DOME SCONCE

BY WORKSTEAD

With its bold half-hemisphere shape, the Woven Dome Sconce makes a striking yet tactile statement, dispersing light in a radiant glow and adding a textured focal point to the wall. Whether used individually, in pairs, or repeated along a corridor, this fixture's scale brings a dramatically graphic presence to any space. Countering this monolithic dome is the addition of a delicate pull-chain which lends a touch of vintage charm and balances the fixture's sculptural form with effortless usability. UL/cUL/CE Listed.
